

PRODUCT MARKETING · GTM STRATEGY CASE STUDY

From Product-Centric Marketing to Value-Led Lending Solutions

Supporting portfolio positioning, SEO, content strategy, campaign intelligence, and sales enablement

Case study context: Moody's Lending Technology Portfolio (Lending Suite)

Illustrative case study prepared for portfolio review — quantitative outcomes shown only where documented.

Building a Unified Lending Portfolio

WHY NOW

Competitors are shifting to integrated, AI-driven lending platforms; banks and lenders want end-to-end coverage — borrower engagement through compliance — rather than piecemeal tools.

- 1**

Portfolio clarity

A single, coherent lending story instead of fragmented products
- 2**

Customer relevance

Positioning organized around lending workflows, not feature lists
- 3**

Scalable GTM structure

A framework that absorbs new modules without re-architecting messaging
- 4**

Consistent messaging

One value narrative across web, sales, and campaign assets
- 5**

Support for new capabilities

Room to introduce AI modules and asset-class offerings coherently

Six Forces Shaping the GTM Problem

Lending Suite Architecture

Reflects Moody's published Lending Suite architecture.

Targeted experiences for Commercial & Industrial, Commercial Real Estate, Agriculture, and Small Business portfolios.

A Portfolio Built in Stages

PHASE 1 · 2023

Origination & Monitoring

CreditLens rebranded to Lending Suite; Origination and Monitoring packages established

PHASE 2 · 2024

AI-Enabled Modules

Automated Spreading, Credit Memo, and Covenants introduced

PHASE 3 · 2025

Asset-Class Offerings

CRE, Agriculture, and Small Business offerings launched

Each phase broadened portfolio depth — from core lending workflows, to AI-assisted execution, to asset-class specialization — without fragmenting the customer story.

Connecting Strategy to Execution

STRATEGY

- **Portfolio & Product Understanding**
Collaborated with product teams to understand lending solutions
- **Customer & Buyer Research**
Researched ICPs, buyer personas, and regional needs
- **Value Proposition & Messaging**
Shifted communication from features to customer value

EXECUTION

- **Content Development**
Webpages, brochures, video scripts, “how it works” infographics, demo GIFs, campaign assets
- **SEO**
Keyword research and audience language informing content
- **Campaign Intelligence**
Briefs, ad copy, performance monitoring, and optimization support
- **Website Analytics**
Attribution analysis and heatmaps supporting page optimization
- **Sales Enablement**
Sales plays, battle cards, newsletters, and Salesforce reporting

Persona-to-Workflow Framework

Illustrative framework — generalized lending roles, not confirmed company-specific personas.

Lending Role	Core Problem	Primary Workflow Need	Regional Consideration
Credit / Underwriting	Manual spreading and inconsistent risk assessment	Faster, more consistent decisioning	Varies by lending regulation and data availability
Loan Operations	Fragmented handoffs across origination stages	Streamlined loan operations workflow	Process maturity differs by market
Relationship / Origination	Slow borrower engagement and onboarding	Faster borrower engagement cycle	Local borrower expectations differ by region
Portfolio / Monitoring	Limited visibility into covenant and portfolio risk	Ongoing monitoring and early risk signals	Reporting requirements vary by jurisdiction

From Features to Customer Value

BEFORE — PRODUCT-CENTRIC (CREDITLENS)

“OCR for PDF statements, Orbis database integration, and automated tax return reading.”

- Describes what the product does
- Centers on a single named product
- Requires prior product knowledge to see value

AFTER — VALUE-LED (LENDING SUITE)

“Reduce origination time and eliminate manual errors.”

- Leads with the customer and their outcome
- Portfolio-level framing, not a single product
- Understandable without prior product knowledge

Real example drawn from CreditLens and Lending Suite marketing materials.

Messaging in Practice — Original Materials

Original diagrams from CreditLens and Lending Suite marketing materials, used with permission.

OLD — CREDITLENS (PRODUCT-CENTRIC)

Extending Further with the CreditLens Solution

Deliver the ability to decrease time to decision while increasing asset quality through stronger risk controls.

Feature-led: OCR, Orbis integration, tax return reading.

NEW — LENDING SUITE (VALUE-LED)

Workflow-led: Borrower Engagement → Origination → Monitoring, Moody's data throughout.

Solution Webpages, Brochures & Video

Brochures are downloadable from each product's landing page — shown here as one linked destination per product.

Product	Landing Page + Brochure	Video / Additional Evidence
Loan Origination (Overview)	moodys.com/solutions/lending/loan-origination	Video

“How It Works” — Original Infographics

Original product infographics, used with permission.

5-step walkthrough: document upload → ML processing → spread review team → validation & adjustments → ready to import.

5-step walkthrough: select company → upload supporting documents → choose memo sections → enrich with Moody's data → cited, reviewable memo.

6-step walkthrough: read active covenants → notify clients → secure document upload → auto-file & organize → internal validation → compliance testing.

Four Pillars of Customer Value

Efficiency & Speed

- Automated workflows cut origination time
- AI modules reduce manual spreading and memo creation

Risk & Compliance

- Integrated Moody's data ensures high-quality credit risk analysis
- Automated covenants and monitoring uphold organizational policies

Flexibility & Scale

- Modular packages (Origination, Monitoring) allow phased adoption
- Industry-specific tailoring (CRE, Agriculture, SMB) meets diverse client needs

Customer Experience

- Borrower engagement tools streamline onboarding
- End-to-end visibility improves trust and transparency

APPLIED

Automated Credit Memo: manual drafting > automated generation > faster, more consistent memos > more underwriter time for judgment

A Continuous Research-to-Content Loop

Campaign Observations Across Markets

Shown as campaign-level observations, not universal market conclusions.

US

United States

- Loan Origination campaigns showed strong relevance

EMEA

Europe, Middle East & Africa

- Portfolio messaging extended to EMEA audiences

APAC

Asia-Pacific

- Automated Spreading showed relevance in APAC
- Agriculture lending engagement observed in Australia

Cross-regional segment observation: Automated Credit Memo showed relevance for small-business-related needs, independent of a single region.

From Brief to Optimization

LED & DEVELOPED

- Campaign briefs documenting products, goals, and value propositions
- Ad copy for Google and LinkedIn campaigns
- Performance monitoring and optimization recommendations

NOT DIRECTLY EXECUTED

- Day-to-day media buying and ad platform operation

Role focused on strategy, briefs, copy, and analysis — supporting, not operating, platform execution.

Ad Creative — A/B Test Variants

Actual LinkedIn ad creative from the Automated Credit Memo campaign, used with permission.

Variant A — Team photo · “A single credit story...” · CTA: See it in action

Variant B — Abstract visual · “AI aligned with your credit policy” · CTA: See it in action

Variant C — Team photo + Variant B headline (creative swap test)

Variant D — “Generate Credit Memos in Minutes” · CTA: Learn more

Message ad — Omar Khan, Sr. Director, GenAI Strategy & Solutions

Message ad — Pavle Sabic, FRM, Sr. Director, GenAI Strategy & Solutions

Behaviour-Informed Optimization

Illustrative insight-to-action pattern — no specific metric values are shown or implied.

INSIGHT → ACTION

INSIGHT

Heatmap analysis identified drop-off points mid-page

ACTION

Informed page restructuring recommendations

INSIGHT

Attribution analysis linked engagement to specific content types

ACTION

Prioritized higher-performing content formats

INSIGHT

Bounce rate patterns flagged weaker landing experiences

ACTION

Supported targeted messaging and layout refinements

Marketing ↔ Sales Alignment

MARKETING PROVIDES

- Sales plays aligned to portfolio positioning
- Weekly sales newsletters on marketing activity
- HighSpot campaign pages
- Feature grids and battle cards
- Competitive analysis

SALES CONTEXT RETURNED

- Salesforce reports and lead lists
- Field context on prospect engagement
- Feedback on messaging and positioning resonance

Purpose: help sales teams understand relevant marketing activity and act on prospect engagement in real time.

One Continuous, Iterative Cycle

Budget Stewardship & Revenue Impact

\$22.8M

Total marketing budget managed

LinkedIn + Google Ads, across 3 years

\$7.6M

Average yearly budget

\$4.5M LinkedIn · \$3.1M Google Ads

\$3.1M

SQL influenced (2025)

Loan Origination — sourced via SEO-optimized webpage

\$1.59M

Revenue influenced

Via Google & LinkedIn ad campaigns

2025 FLAGSHIP WIN

A customer came in directly from our website and said the Loan Origination webpage gave them the relevant information they needed to move forward — resulting in a \$3.1M SQL (sales-qualified lead) traced directly to SEO-led website optimization.

Recognized and celebrated internally as a flagship example of SEO and website optimization translating directly into pipeline value.

What I Delivered, and Why It Matterred

A. WHAT I DELIVERED

- Developed customer-focused messaging and value proposition frameworks
- Created content for webpages, brochures, and sales materials
- Supported campaign briefs and developed Google & LinkedIn ad copy
- Analyzed website behaviour and attribution to inform optimization
- Created sales enablement assets: battle cards, feature grids, newsletters

B. STRATEGIC CONTRIBUTION

- Helped connect product capabilities to customer problems and value
- Supported portfolio-wide positioning consistency across channels
- Contributed to closer marketing and sales alignment
- Helped bring SEO and audience insight into content decisions
- Supported data-informed optimization across web and campaigns
