PROFILE SUMMARY

- Strategic Product Marketing Manager and Growth Marketing Partner with 6 years of experience setting go-to-market (GTM) direction, defining positioning, and guiding execution teams to deliver measurable pipeline growth. As a GTM Partner and Go-to-Market Manager during her 3-year tenure at Moody's Analytics (Banking Unit), she owned GTM strategy for the Lending Solutions portfolio — shaping positioning for 12 global product launches and influencing ~\$1.59M in sales pipeline across the US, EMEA, and APAC in 2026.
- A data-driven Growth Manager and Product Marketing Manager, she brings a strong analytical foundation: evaluating campaign and budget performance, identifying gaps, and converting insights into data-backed recommendations for leadership and execution teams. She combines strategic product marketing with hands-on capability in market and competitive research, strategic product messaging and positioning, building buyer personas and ICPs, content strategy, campaign management, marketing insights dashboards (Power BI, Excel), and AI-driven workflow automation (n8n, LLMs, AI agents) — with cross-industry experience spanning B2B SaaS, financial services, OTT, healthcare, hospitality, and D2C.
- As an AI-enabled growth partner and marketing innovator, she has independently built AI agents and automated workflows for content audits, newsletters, web content traffic analysis, sales enablement content, and marketing operations — using n8n, Claude Code, Microsoft Copilot Studio to scale execution.
- A marketing data visualization specialist with hands-on expertise in Advanced Excel, Basic SQL, Power BI, Google Analytics, and Salesforce reporting, she built a fully personalized performance dashboard in one week versus an estimated 4–6 week internal delivery timeline.
- An integrated Growth Marketing Manager and GTM leader with experience across performance marketing, SEO, web analytics, product content, and campaign ownership, she has partnered with globally distributed stakeholders across the US, UK, and Costa Rica — bringing a distinctive ability to unify Product Marketing, Demand Generation, and AI into a single GTM engine.
